Paul,

I spoke to Leslie this morning about submitting the reclamation plan for US Magnesium on Monday.

While I have made significant progress on this project, it will not be ready on Monday. I am waiting on the following:

- a final version of the SPCC plan
- the surety bond to be in place
- agreement between Cargill Salt and US Magnesium, on some of the language
- a review with Leslie

I want to submit as complete and correct a plan as possible to Leslie. She wants this as well.

I need an extension to Monday, May 11 to submit the final version to UDOGM.

Thanks for your help.

Brent Cook

Thank you for your message and your work to complete the plan. That will be fine. I will print this message for our file.
